

Venkata Sandeep Macha

Software Engineer I

v.macha@ufl.edu — +1 (656) 212-2099 — [LinkedIn](#) — [GitHub](#)

Professional Experience

Software Engineer, University of Florida

Sep 2024 - Present

- Built scalable backend services using **Java** following **software design principles** and **coding best practices** to support production workflows integrated with **Relational databases**.
- Implemented frontend workflows using **JavaScript** and **TypeScript** connected through **Microservice architectures** to backend APIs, improving task completion efficiency by 25% while ensuring **secure coding practices**.

Cloud Virtual Intern, APSCHE - AWS Academy Program

Jan 2023 - May 2024

- Built microservice infrastructure on **cloud technologies** using **AWS** to support **AI/ML** applications through scalable **NoSQL databases**.
- Developed and deployed **RESTful APIs** following **Agile practices** and **CI/CD pipelines** to improve backend processing efficiency and reduce response time by 40%.

AI-ML Intern, APSCHE - AWS Academy Program

Sep 2023 - Nov 2023

- Built AI pipelines integrating **TensorFlow** and **Hugging Face** models to process structured data using **Database design** concepts.
- Implemented anomaly detection logic using **C** with **automated testing** to improve system reliability by 20%.

Education

University of Florida

Aug 2024 - May 2026

Master of Science in Computer and Information Science and Engineering

GPA: 3.74

Sree Vidyanikethan Engineering College

Oct 2020 - Jun 2024

Bachelor of Technology in Computer Science Engineering

GPA: 9.35

Projects

Serverless AI Resume Analyzer | *Java, LLM APIs, Databases*

Nov 2025 - Present

[Live Demo](#)

- Designed resume analysis services using **Prompt engineering** and **LLM APIs** integrated through **Azure OpenAI** architecture to process candidate data stored in **Relational databases**.
- Implemented document understanding workflows using **LangChain** and **Semantic Kernel** to improve job alignment accuracy by 60%.
- Built compute processing modules using **C** and applied **Containerization** with **Docker** to improve maintainability.

AI-Powered Invoice Generator | *Responsive UI/UX development, Databases*

Jun 2025 - Sep 2025

[Live Demo](#)

- Engineered invoice extraction workflows using **Llama** integrated through **AI SDKs** to process stored transaction data.
- Integrated automation using **Grok** through **DevSecOps** pipelines to analyze invoice metadata stored in **NoSQL databases**, reducing manual effort by 70%.
- Developed frontend interaction layers using **Responsive UI/UX development** with **React** to visualize processed invoice data.

Skills

Languages: Java, Python, JavaScript, TypeScript, SQL, C

Programming: proficiency in at least one programming language

Software: software design principles, coding best practices

Databases: Database concepts, Relational databases, NoSQL databases

Cloud: cloud technologies, AWS

AI/ML: AI/ML, Prompt engineering, LLM APIs, LangChain, Hugging Face, TensorFlow, Semantic Kernel

DevOps: Agile practices, DevSecOps, CI/CD pipelines, Containerization, Docker, Kubernetes

Security: secure coding practices, automated testing

Architecture: Microservice architectures, Monolithic architectures

Certificates

AWS Solutions Architect
Java, HackerRank

SQL Certification, Coursera
Introduction to CyberSecurity, Cisco
